Bill got the programming rack wired temporarily and tested. Awaiting finalization of the staging yard and final track installation. Connected an interface panel at the main yard.

The last power supply has been found and it will be mounted along with the breakout board. Needs some wood cutting to fit and mounting of the breakout board needs to be mounted to the power supply enclosure itself because of cable orientation coming out of the power supply.

## **WEST PASCO MODEL RAILROAD DESIGN TEAM MEETING NOTES**

More design work has been done and the final design is almost ready to propose to the design team. Utilization of the window sill along the front wall was accomplished.

Neil wonders why we turned down his subway concept. Here's why:

We can't rebuild the layout every week after Godzilla has his way with it.
